

The Botteva Collection is rooted in the quiet rhythm of hand and tool. Drawn from the instruments of the trade, each one is a tribute to the spaces where beauty is shaped, not manufactured. These are floors with soul: surfaces weathered by design, grain patterns that speak in movement, and textures that feel worn, not polished.

Crafted in character grade, every plank bears the imprint of its making, knots, marks, and variation left intentionally visible, like the signature of the artisan. Bold, grounded, and deeply tactile, Botteva is a collection for those who see the poetry in process and the elegance in imperfection.
